The built-in LEDs on an aluminum core circuit board are mounted on the side of the aluminum frame, a laser-cut diffuser with thousands of tiny lenses distributes the light evenly and without shadows on the opal luminaire surface. The sturdy aluminum frame is matt white as standard, but can be manufactured in many RAL colors on request, taking minimum delivery quantities into account. It also serves as a heat sink for the LEDs. Even in continuous operation, the luminaire does not get warmer than approx. 35 ° C. The panel luminaire corresponds to LM 78 and LM 79 with an efficiency of 120 lm / W

This luminaire is also available with an efficiency of 150 lm / W and has almost the same brightness with a power consumption of just 24 watts, corresponding to energy class C.

With a luminous flux of 3900 lm, this flat LED luminaire easily replaces conventional luminaires with 4 x 18 watt fluorescent tubes with a total power consumption of approx. 110 watt (incl. ballast).

The closed luminaire is also easy to clean, the external, plug-in power supply unit is easy to replace. Dimmable versions (PMW or 0-10 Volt, DALI) are also available.

We offer this luminaire in 4 light colours at CRI Ra > 80:

Warm white	2800 - 3300K
Nature white	3800 - 4200K
Pure white	4800 - 5300K
Cold white	5800 - 6500K
